Shared with others (visible to management)

It's been great working with you, and I would appreciate your perspective. In the last three months, what are one or two things (actions, approach, skills, experience, etc.) you think I have excelled at in my job – things I should keep or continue to do?

Alex is easily one of the most, if not the most, productive members of our team. He is a master at resolving issues, but at the same time is not afraid to ask questions when it is needed. Not only that, he also spends a great deal of his time helping and training others. I honestly believe that our team would not run nearly as smooth as it is now.
